

CADD Centre, pioneers in CAD education in the country has launched a new course on GD&T (Geometric dimensioning and Tolerancing). Geometric dimensioning and tolerancing (GD&T) is a language used on mechanical engineering drawings composed of symbols that are used to efficiently and accurately communicate geometry requirements for associated features on components and assemblies. GD&T is, and has been,

successfully used for many years in the automotive, aerospace, electronic and the commercial design and manufacturing industries.

Participants successfully completing this course will be able to understand, evaluate and use geometric dimensioning techniques. They will be able to read and fully understand blueprint drawings of mechanical devices. Course available at select centres only.

## ■ CADD Centre: Largest network of PMI REP (Registered Education Provider) in the world

CADD Centre is the largest CAD/CAE/Project Management training organization and also has the largest network of PMI REPs in the world.

CADD Centre, spanning across 260 cities in India and 15 offices overseas, is the hub of Project Management training through Primavera or Microsoft Office Project courses.

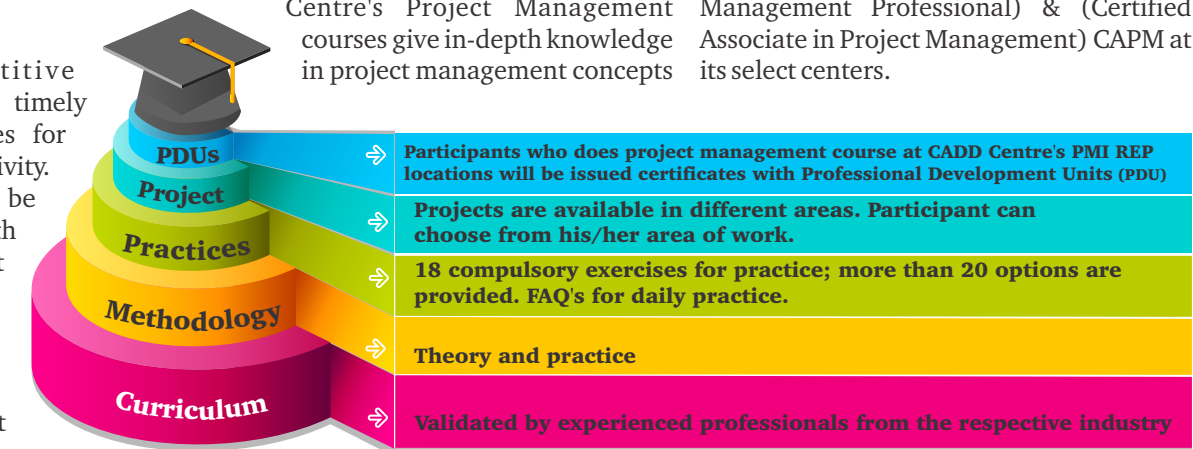

The fast-paced competitive corporate world demands timely delivery of efficient services for greater profit and productivity. These demands can only be fulfilled by individuals with project management knowledge and skills. Project management has evolved to become an integral part of professional culture. In today's business environment

it is essential for managers, engineers, and executives from junior level to top most level to have project management skills.

### What is unique about the Project Planning Management (PPM) course at CADD Centre?

CADD Centre unfolds its immense 22-year experience in technical training. CADD Centre's Project Management courses give in-depth knowledge in project management concepts

as well as in the soft tool. The five phases of project management that are taught include Initiation, Planning, Execution, Controlling, and Closure. Participants also learn MS Project (MSP) and Primavera Project Planner: the well-known project planning and management tools. CADD Centre also conducts PMI certification preparatory courses on PMP (Project Management Professional) & (Certified Associate in Project Management) CAPM at its select centers.

### Do you know?

International Project Management Day (IPM Day) is celebrated on November 5 of every year by project professionals all over the world. IPM Day was established as a way of recognizing the extraordinary efforts made by project management professionals everywhere – across industries and geographies. It is intended to encourage project based organizations worldwide or organizations who utilize project management methodologies to schedule some type of recognition event within their organizations or coordinated locally with others to truly demonstrate appreciation for the achievements of project managers and their teams.

The Project Management Office (PMO) in a business or professional enterprise is the department or group that defines and maintains the standards of process, generally related to project management, within the organization. The PMO strives to standardize and introduce economies of repetition in the execution of projects. The PMO is the source of documentation, guidance and metrics on the practice of project management and execution.

## ■ Top 10 Reasons for Organizations to support PMI credentials

Leading organizations and governments around the world invest in professional credentialing for project management.

### By supporting PMI credentials...

1. Your workforce will understand processes and terminology. To obtain a credential, individuals must pass a multiple-choice exam and other evaluations based on the current body of knowledge and tasks related to the job role.

2. Your workforce will be more disciplined. Credential holders are not only tested on their knowledge of project management terminology and processes, but also on their competence to perform in their roles.

3. Your workforce will know what to look for before they start a project. By understanding the common processes and terminology, your project team learns the steps of initiating, executing, and closing a

project, thereby making success more likely.

4. Your workforce will value team work. Certified project management practitioners tend to have good communication and human resource management skills and are able to take advantage of diverse expertise through collaborative efforts.

5. Your clients will have increased confidence because your project team uses baseline of terminology and practices. This shows that your project team operates in harmony with one another, creating a more efficient and fluent workflow thus leading to better results. Clients can be confident that projects will be handled in a better way.

6. Your clients will have increased confidence because your credentialed project team has an ethical code. PMI credential holders must adhere to the PMI Code of Ethics and Professional Conduct which shows clients that your project team operates with integrity.

7. Your clients will have increased confidence because your project team has knowledge of the most up-to-date global practices. PMI credential holders must participate in the Continued Certification Requirements (CCR) program to maintain an active certification status. The CCR program requires credential holders to partake in professional development activities throughout the year.

8. You will have repeatable processes and improved project results. This prevents you and your project teams from having to start from scratch every time you begin a new project because disciplined project management calls for lessons learned and shared process assets.

9. You will retain employees by investing in their professional development. When you invest in your employees' professional development, you show your commitment to them and in turn, they will be more

committed to the organization. You will be able to retain employees and attract new talent.

10. You will help grow the profession of project management. By endorsing PMI credentials, you provide long-term career paths in project management for your workforce.

**Top 10 Reasons for an Individual to Earn a PMI Credential**

meeting standard requirements established by global project management practitioners.

4. PMI credentials can lead to greater earnings. Many credential holders experience salary increases because of their certification status.

5. PMI credentials can lead to career opportunities and advancement. Our family of credentials identifies you as a practitioner who has demonstrated competency in project management processes and in knowledge and experience in specialty areas of practice based on industry standards.

6. PMI credentials prepare you for greater job responsibilities. Our credentials indicate your willingness to invest in professional development. This enables credential holders an awareness of changing processes and terminology in the field.

7. PMI credentials improve skills and knowledge. Preparation for a PMI credential requires study and review of current project management processes. Earning a credential highlights your

knowledge and competence and proficiency in your practice.

8. PMI credentials build self confidence. With a PMI credential, you define yourself beyond a job title while gaining a sense of personal satisfaction.

9. PMI credentials allow for greater recognition from peers. PMI credential holders gain increased recognition from their peers for taking the extra step in professional development.

10. PMI credentials enhance the profession. PMI's certification program promotes practitioners and supports ongoing professional development.

*Project Management(PM) - Humor*

- PM Proverbs

- ❖ The same work under the same conditions will be estimated differently by ten different estimators or by one estimator at ten different times.
- ❖ The most valuable and least used PHRASE in a project manager's vocabulary is "I don't know".
- ❖ Nothing is impossible for the person who doesn't have to do it.

- ❖ If you don't stand for something, you'll fall for anything.
- ❖ Of several possible interpretations of a communication, the least convenient is the correct one.
- ❖ Anything that can be changed will be changed until there is no time left to change anything.
- ❖ If you fail to plan you are planning to fail.

Helping the CEO is a good thing, right...?

A young project manager was leaving the office one evening when he found the CEO standing in front of a shredder with a piece of paper in his hand. The Project Manager (PM) was new to the company and wanted to make a good impression with the senior so he approached him.

"Listen", said the CEO, "this is important and my assistant has left. Can you make this thing work?"

"Certainly", said the young man, flattered that the CEO had asked him for help. He turned the machine on, inserted the paper and pressed the start button. "Excellent! Excellent!" said the CEO as his paper disappeared inside the machine.

"I need two copies of that."

While amusing, this bit of PM humor can also serve as a reminder to make sure you get task requirements right and don't assume what the stakeholder wants out of a project!
